

ID: 0 (xmin, ymin)

ID: 1 (xmin, ymax)

ID: 2 (xmax, ymax)

ID: 3 (xmax, ymin)

Hint:

- The top-left black corner marks the marker's position.
- For optimal detection contrast, cut along the thin line, ensuring the outer white area remains intact.
- Precise printing at a specific size is not required, just ensure the camera can clearly see it.
- Generate your own (id 0-3) [here](#) as svg if needed. Or [here](#) to include the white border (e.g. in case you want to 3d print them).
